

**Invitation to the
RecurDyn TechnologyDays 2023
on May 3rd and 4th
in the**

Coming together is the beginning,
staying together is process,
working together is success

Slightly modified, we would like to use this quote from the world-famous inventor and automotive pioneer Henry Ford (1863 – 1947) as the motto for our invitation to this year's RecurDyn Technology Days:

Coming together was the beginning to convince you of RecurDyn
staying together is only possible through continuous improvements
working together for 20 years is a real success – thanks to you.

In 2023, the RecurDyn Technology Days will again take place on two days.

As usual, the first day of the event is dedicated to the user's presentations. Here, our users explain their special tasks and how they could be successfully solved with the help of RecurDyn. Furthermore, we are pleased to present our latest release "RecurDyn 2023" with many interesting new features.

On the second day, the workshops will not just offer our participants the opportunity to learn more about new features of RecurDyn, but also to increase their knowledge about already existing ones.

Following another motto of Henry Ford: "The biggest enemy of quality is the hurry", we plan a cozy Bavarian evening after the first day - without any stress, hectic or rush. Together with you, we would like to celebrate our 20th anniversary – because without you and your trust in our team and in RecurDyn, this would not have been possible.

During the RecurDyn Technology Days, we would like to offer you plenty of time to exchange ideas with other users and discuss your wishes/ideas with our RecurDyn team.

From 2023/February/1st, you can register online on our website. If you would prefer to receive a registration form by email, please send us an email to: TechnologyDays@RecurDyn.de with the subject: Request for Registration form. We will be glad to send it to you.

Of course, we are at your disposal at any time for further questions. We would be very pleased to welcome you back to Munich after such a long time.

Your RecurDyn Team
